

Himanshu Kumar

Python AI Developer

Pune, India | 7667056566 | himanshuhk7667@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 3.5+ years of professional experience in backend development and hands-on, self-driven expertise in building LLM-powered applications. Skilled in Python, LangChain, Retrieval-Augmented Generation (RAG), and prompt engineering, with working exposure to FastAPI for serving AI applications. Strong foundation in data structures, algorithms, and production software engineering from enterprise backend development on ASP.NET Core. Experienced in AI-assisted, spec-driven development workflows using Claude and GitHub Copilot to accelerate prototyping and delivery.

TECHNICAL SKILLS

Programming Languages: Python, C#, SQL

AI / GenAI: LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLM Application Development

AI-Assisted Development: Spec-Driven Development, Claude, GitHub Copilot

Application / API Layer: FastAPI, ASP.NET Core Web API, Entity Framework Core

Data Handling & ML: NumPy, Pandas, Scikit-learn

Backend & Cloud (Professional): ASP.NET Core, Entity Framework Core, SQL Server, Microsoft Azure

Core CS: Data Structures & Algorithms, Object-Oriented Programming, RESTful API Design

AI / GENAI PROJECTS (SELF-DRIVEN)

- Built LLM-powered applications in Python using LangChain, including prompt-engineered chains and Retrieval-Augmented Generation (RAG) pipelines for context-aware question answering.
- Designed and exposed LangChain-based applications through lightweight FastAPI endpoints for testing, integration, and demonstration.
- Applied prompt engineering techniques to improve LLM response quality, consistency, and reliability across use cases.
- Used spec-driven, AI-assisted development workflows with Claude and GitHub Copilot to accelerate prototyping and reduce development time.
- Applied NumPy, Pandas, and Scikit-learn for data handling, preprocessing, and basic machine learning tasks supporting AI application development.

PROFESSIONAL EXPERIENCE

Senior Systems Engineer, Infosys

Aug 2022 – Present

Project: Boeing Aircraft Body Design Application (ASP.NET Core) | Pune, India

- Implemented business logic in the Data Access Layer (DAL) using Entity Framework Core to support core application workflows.
- Developed and maintained the Service Layer using ASP.NET Core Web API, enabling reliable integration between application modules.
- Debugged and resolved application issues across the stack, improving system performance and reliability.
- Collaborated with cross-functional teams to deliver enterprise-grade backend features on schedule.

Training Project: Online Shopping Application

- Contributed to the design and development of an online shopping application as part of structured onboarding training at Infosys.

EDUCATION

B.Tech, Electronics and Communication Engineering

Jaypee Institute of Information Technology, Noida

CORE COMPETENCIES

Effective Communication | Strong Logical Reasoning & Problem-Solving | Quick Learner of New Technologies | Leadership & Team Collaboration
