

HIMANSHU KUMAR

GenAI Engineer | LLM Applications, RAG & Agentic AI

Pune, Maharashtra | 7667056566 | himanshuhk7667@gmail.com | linkedin.com/in/himanshu-kumar-genai

PROFESSIONAL SUMMARY

GenAI Engineer with 3.5+ years of software engineering experience and hands-on expertise building LLM-powered applications — RAG pipelines, multi-agent workflows with LangGraph, and conversational AI systems using Python and LangChain. Strong production engineering foundation from enterprise backend work on ASP.NET Core and FastAPI. Skilled at designing retrieval architectures, optimizing prompts to reduce hallucinations, and shipping AI features end-to-end using AI-assisted, spec-driven development workflows.

SKILLS

Generative AI / LLM: LangChain, LangGraph (Multi-Agent Workflows), RAG, Prompt Engineering & Optimization, OpenAI API, Embeddings, Semantic Search, Hugging Face, Conversational AI

Languages: Python, C#, SQL, Java

Backend & APIs: FastAPI, ASP.NET Core, RESTful APIs, Microservices, Entity Framework

Databases: SQL Server, PostgreSQL, ChromaDB, FAISS, Pinecone

Cloud & DevOps: Azure, Docker, Kubernetes, CI/CD, Git, GitHub Actions

Other: NLP, Scikit-learn, NumPy, Pandas, Data Structures & Algorithms, Agile/SDLC

PROFESSIONAL EXPERIENCE

Infosys Limited — Associate Consultant (Python & Generative AI)

Jan 2025 – Present

Client: UBS | Enterprise AI Assistant for Internal Knowledge Management

- Built RAG pipelines with LangChain and FastAPI enabling question-answering over enterprise documents, cutting average document search/lookup time by ~35%; integrated OpenAI, Groq, and Claude for summarization and conversational AI.
- Designed multi-step AI agents using LangGraph with conversation memory and tool calling, adopted by 3+ internal teams, implemented semantic search with ChromaDB, improving retrieval accuracy by ~20%.
- Developed and containerized REST APIs (FastAPI, Pydantic, Docker) for chat, document upload, and agent interactions; optimized prompts to reduce hallucination rate by ~25%.

Infosys Limited — Systems Engineer (.NET Developer)

Aug 2022 – Jan 2025

Client: Boeing | Aircraft Design and Engineering Application

- Developed and optimized backend APIs and database queries using ASP.NET Core, C#, SQL Server, and Entity Framework Core, reducing average API response time by ~30%.
- Delivered 15+ features and production fixes in an Agile environment, using Git and Azure DevOps CI/CD pipelines for source control and deployment.

PROJECTS

AI-Powered RAG Chatbot

Python, FastAPI, LangChain, ChromaDB

- Built a RAG chatbot answering questions from uploaded PDFs using LangChain for document chunking, embeddings, and retrieval, with ChromaDB semantic search reducing hallucination rate by ~20%.

AI Chatbot with Memory

Python, FastAPI, LangChain, Docker

[Live Demo](#) | [GitHub](#)

- Developed and containerized a context-aware chatbot with conversational memory and prompt engineering for multi-turn interactions, deployed to a cloud platform.

EDUCATION

B.Tech, Electronics and Communication Engineering — Jaypee Institute of Information Technology, Noida
